-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 January 2002.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Double Patenting

1. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

1. Claims 1-25 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-8 of U.S. Patent No. 6 339 785 B1. Although the conflicting claims are not identical, they are not patentably distinct from each other because claim 1 of the instant application recites subject matter recited in claim 1 of the patent, the only differences being that the element "server" in the patent is recited as "computer" in the instant application and the "...c) assembling [a] file at [a] client from [a] plurality of portions" recited in the patent is recited as "assembling [a] file from [a] plurality of portions" in the instant application. Patent 6 339 785 discloses:

"Transfer protocols for downloading files from serving computers (servers) to client computers (clients)...are well known and used in the art." (column 1, lines 9-11)

Art Unit: 2143

"The portions received at the client are then assembled to form the requested file..." (Figure 2, step 150; column 3, lines 37-38)

It would have been obvious to one of ordinary skill in the art that the "server" as recited in the patent would be considered a "computer" as claimed in the instant application because the "server" is known as a "computer" from which files are downloaded.

It also would have been obvious to one of ordinary skill in the art that the "assembling [a] file at [a] client from [a] plurality of portions" as recited in the patent would have to be done at the client because the method recites the retrieval of the portions from a "server" or "computer" and, in view of the disclosures of the patent, the client is the only element where the "assembling [a] file from [a] plurality of portions" as recited in the instant application can be completed.

Claims 1 and 25 of the instant application also recite subject matter similar to claim 1 of the patent. The claims of the instant application is not patentably distinct in view of the differences between the claims and the motivations regarding the obviousness of the differences between the claims shown above.

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
